

Client References

References from some of Galligan Engineering Solutions valued clients;

Jack Priestley—Contracts Director

We use Galligan Engineering Solutions for the preparation, completion and issuing of all our Maintenance Manuals. All these Manuals are issued in Hard and Soft format. As well as the preparation and issuing of these Manuals, all As Built Drawings that we are required to do are compiled and issued by Galligan Engineering Solutions. They have complete access to our computer system records and can access Purchase Orders and Construction drawings so they can pursue the data they need. We find Brian Galligan very efficient and responsive with the quality of his work to the highest standard and always to the agreed schedule.

As such we highly recommend Galligan Engineering Solutions

Mick Kearney—Contracts Manager

We have recently been introduced to Galligan Engineering Solutions for the production of our Operation and Maintenance Manuals. We have found that they offer a great professional service and end product. The production of Manuals for handover at the end of every project was a time consuming chore and we are glad to of found Galligan Engineering Solutions who specialise in this field.

Brian Nolan—Managing Director

Conquer Engineering Ltd has used Galligan Engineering Solutions to produce their Operation and Maintenance Manuals on a number of projects over the last few years. The service / research provided by Galligan Engineering Solutions when compiling and producing these manuals is of an exceptionally high standard and have proved to be a huge time saver and solace to our company.

Robert Fenlon—Managing Director

We have employed Galligan Engineering Solutions on many projects. Their brief is to construct hand over manuals which cover all parts of the project installation and design. These manuals are extremely important to us and give our customer the sign off and guarantee that work is not only complete but certified. We have found their attention to detail and knowledge of electrical systems installation and integration extremely beneficial. Their ability to undertake what was asked of them, often at short notice, has aided us in producing quality designs and or hand over materials without a massive input from our office staff. I am delighted to recommend Brian and his company and should a further reference be required I would be happy to take a call.
